New John Pilger Documentary:

The War on Democracy

Award winning journalist John Pilger examines the role of America's manipulation of Latin American politics during the last 50 years, as well as the emerging struggles of millions of Latin Americans to free themselves from foreign domination.

The focal point of the movie is Pilger's travels in Venezuela, where he sees the "Bolivarian Revolution" in full swing and interviews President Hugo Chavez. Using Chile and Bolivia as case studies, he also utilizes archival footage, interviews with ex-CIA agents, and direct testimony to construct the brutal history of US interventions against progress in Latin-America. However, by documenting the new movements in these countries, the film is very clear, "Latin-America is on the Move!" and making new victories in the Battle of Ideas.
